## DOMETIC ON THE WEB

Here's where you can find the complete Dometic range, with detailed information about all products. Plus, interesting facts about our company and download links for all our catalogues.

DOMETIC.COM

## AT YOUR SERVICE.

Individual, discreet and available at all times, service has many faces, but only one goal: to provide very special all-round comfort. With Dometic's exceptional miniBars, good service becomes even better. They make room for extra comfort and enhance the individual character of the interior.

A miniBar from Dometic never rests. Available 24 hours a day, it provides an additional service that always pays off. It also runs

noiseless, without moving parts and vibration, and is very economical in terms of energy consumption. That brings an efficiency benefit as well as additional comfort. Wherever it is used – a miniBar from Dometic is bound to boost sales and customer satisfaction. It caters for the needs of guests without disturbing their privacy, and provides a service that is discreet in the background but still readily available.

### DISCOVER DOMETIC THE WORLD'S NUMBER ONE FOR MINIBARS

- More than 45 years of experience in the hotel industry
- More than 5 million miniBars installed around the world
- 10 million absorption refrigerators produced, "Made in Germany"
- All products are manufactured in Dometic owned production plants
- All Dometic production plants are certified according to ISO 9001 and ISO 14001
- Global customer support in more than 100 countries
- Comprehensive product range: miniBars for all room designs, all requirements and all budgets.
- Research & development, design, production, quality control, after-sales service – everything from a single source

# DOMETIC THE SATISFACTION NETWORK

SUCCESS FROM OVER 90 YEARS OF EXPERIENCE

Noiseless absorption cooling technology has been the foundation of our position as the world's leading provider of miniBars and guest fridges. The company's success is based on a unique combination of know-how, state-of-the-art technology, a pioneering spirit and innovative design. Decades of experience and continuous customer feedback has enabled Dometic to perfect the absorption cooling technology. Today, more than 90 years after absorption cooling was invented, Dometic miniBars are still setting the trend when it comes to quality, technology and design. More than 5 million appliances have already been sold – an unrivalled record of success. The "Satisfaction Network" now spans almost 100 countries and provides personal

support to customers and planners on all continents. The German factory in Siegen is home to the world's largest and most modern production site for absorption refrigerators. Every day Dometic equips two hotels with miniBars somewhere in the world.

# OUR RESPONSIBILITY SUSTAINABLE AND ENVIRONMENTALLY CONSCIOUS

At Dometic, thinking and acting ecologically is an all-embracing process that extends to all levels. In addition to the environmentally sustainable production, this also includes special recycling measures and resource saving products, and in particular the design of energy-efficient miniBars. For instance, the Dometic HiPro 3000 is the most economical absorption miniBar in the world. You can be 100% sure that all the applicable regulations, directives and guidelines are fulfilled at Dometic.

- All Dometic production plants are certified according to ISO 9001 and ISO 14001 as well as the Eco-Management and Audit Scheme
- EMAS-certified company with publication of all environmental results in Dometic Environmental Product Declarations
- All products fulfil the requirements of the European Union's ROHS directive
- All energy consumption labels correspond to the requirements of the Commission Regulation (EC) No. 643/2009 and Commission Regulation (EU) 1060/2010

**DOMETIC MINIBARS**

**PERFECT GUEST SERVICE – 24/7**

**Why should hotels have miniBars?**

Just like the lift or the swimming pool, a guest fridge is part of good customer service. Therefore, the guest fridge is a piece in the mosaic of all the services offered by the hotel. In other words, if the hotel owner does not provide a guest fridge in the hotel room, the hotel service suffers. The best way to use the guest fridge in the total comfort package to Hotel guest can vary from one Hotel to another. Being fully stocked for profit optimisation, or with selected products included in the room rate, a flat fee approach for most sold items or an empty guest fridge for people travelling and expecting a guest fridge to store and chill their personal items like medicine, insulin or food. The convincing concept will very much depend on the guest structure of the Hotel.

**How does the miniBar become an instant profit centre?**

Pricing: if the prices are too high, then the guest will not use the miniBar! The prices in the miniBar should in general not be more expensive than those in the hotel bar.

Product offering: the miniBar selection has to match the type of guests at the hotel and should be clear and not too wide. Some advice: Check what sells well and eliminate “dead ducks”.

Positioning the miniBar: the miniBar should not be “hidden away” in the room. The guest should be tempted to consume something from the miniBar just by looking at it. To trigger an impulse buy, a nicely stocked glass door miniBar close to the TV will do its job.

**What do I need to consider when purchasing miniBars?**

The miniBar has to be silent so that guests can sleep peacefully in the room. But energy consumption, lifetime and support are also important selection criteria. There are various cooling technologies to choose from, but absorption is the best choice for hotel rooms. The HiPro 3000 miniBar by Dometic is the world’s most economical absorption miniBar on the market. When buying a miniBar, make sure that the energy consumption of the appliance corresponds to the EU directives 643/2009 and 1060/2010. With Dometic you can be 100% sure that all the applicable requirements are fulfilled.

**What do hotel managers need to do to ensure that miniBars meet their expectations?**

Pay attention to the right marketing. Leaflets, the website or personal conversations at check-in are the “touch points” to use for promoting the miniBar. Another sales booster could be to offer the guest a sweet or savoury snack from the miniBar free of charge.

Furthermore, a uniform, reasonable pricing model helps – for example, all drinks at the same low price. That is affordable and the guest sees this as fair. Many hotels are now starting to use “all-inclusive” offers, i.e. all drinks and snacks are free for the guest and have already been added to the price of the room.

**PRODUCT FINDER**  
**THE FAST WAY TO THE RIGHT PRODUCT**

**Lifetime**  
Using moving parts in the cooling system determines the service life time substantially. Absorption and NTE miniBars from Dometic do not use any moving parts at all and are therefore ideal for long use.

**Silence**  
The guest’s comfort while sleeping can be disturbed by many things – including a noisy miniBar. Dometic absorption and NTE cooling technology miniBars are completely noiseless (0 dbA).

**Energy efficiency**  
miniBars are operating 24h/7/365 and mostly in more than just one room. That is why energy efficiency plays a major role. Alongside the extremely economical miniBars in the Efficient Class, the HiPro Line miniBars have proven to be the lowest energy consumers amongst absorption miniBars.

**Cooling performance**  
A miniBar should always operate at a stable and desired performance level while working as efficiently and economically as possible. The cooling performance depends on the place of installation, the ventilation as well as on the cooling technology itself.

**Suitable for food storage**  
While miniBars are primarily intended for cooling drinks and snacks, the models from the Food Line also offer the option of storing unpackaged fresh food. The silent appliances in the Food Line ensure an interior temperature of 4 °C for ambient temperatures of up to 32 °C.

## THE COMFORT CLASS BY DOMETIC

QUALITY WITHOUT COMPROMISE  
NOISELESS // LONGEST LIFETIME // TOP COOLING PERFORMANCE

Comfort at the highest level – versatile, comprehensive, reliable. With Comfort Class, noiseless cooling comfort becomes reality. Thanks to innovative absorption technology, Dometic miniBars work completely noiseless and maintenance-free. Four distinguished product lines to suit every Hotel and budget category. Elegant in design and layout, these models make room for drinks and snacks, as well as food, to be efficiently cooled to exactly the right temperature. Comfort Class miniBars are the best choice in the long-run, taking into account their lowest operating cost. They offer great savings potential for you and protect the environment due to a lifetime which

is nearly twice as long as other appliances not using the absorption cooling technology.

- Fuzzy Logic, the intelligent chip controller for optimised temperature management and the lowest power consumption. You lower your energy costs by 50% and more!
- Cooling Unit Control (CUC system) offers maximum security with sensor-controlled monitoring of the cooling unit.
- Fully-automatic defrosting for maximum comfort

THE LOWEST ENERGY CONSUMING ABSORPTION MINIBAR IN THE WORLD

# HIPRO LINE

Dometic HiPro has redefined the standards for pioneering miniBar design – the result of over nine decades of consistent development. With the aim of maximum customer satisfaction, we have scrutinised all the requirements of comfort and technology in detail. The result will impress you.

HiPro miniBars are distinctive due to their progressive design and a whole host of innovative technical detail solutions that are so unique that we have grouped them together under the name HiPro technology.

HiPro technology stands for a quality dimension which only Dometic can offer you.

## FEATURES OF THE HIPRO LINE

Every HiPro miniBar contains the best of 90 years of experience. The HiPro 3000 is the lowest energy consuming absorption miniBar in the world!

- Modular system of shelves and door racks
- Lowest energy consumption for noiseless absorption miniBars
- Setup diagnosis via LED
- Sensor-controlled LED interior light
- LED door opening control display (optional)
- Temperature setting by remote control
- Clip & Click: door hinge can be changed without tools
- Fuzzy Logic Technology
- Automatic Defrost

### HIPRO BASIC

- 2 long shelves
- Flat inner door
- Integrated door handle

### HIPRO STANDARD

- 2 short shelves
- Inner door with 2 multifunctional racks (one for large bottles and one for small)
- Inner door in the "bottle body" design for 1.5-litre bottles
- Integrated door handle

EASY REPLACEMENT OR ADDITIONAL COMFORT  
**CLASSIC LINE**

Energy-saving made easy. With the Classic Line models, contemporary cooling comfort has now arrived. Equipped with innovative and energy-efficient absorption cooling technology, the miniBars ensure silent service and maintenance-free comfort with added value. This is also due to sensor-controlled monitoring of the cooling unit, energy-efficient Fuzzy Logic temperature regulation, automatic defrost and proven Dometic design.

**ARE YOUR MINIBARS MORE THAN 15 YEARS OLD?**

If yes, it's worth replacing your appliance immediately. You can save on energy by more than 50% with today's miniBars featuring Fuzzy Logic technology. Just by saving on energy, your new investment

will pay for itself within a few years, because old miniBars sometimes consume more than double the energy. Get in touch with us! We will be glad to advise you.

SUITABLE FOR FOOD AND MORE  
**FOOD LINE**

Chilled drinks and food right at your fingertips all the time. When there is no room for an ordinary refrigerator, a miniCool in the Food Line series is a great advantage. Whether it's for everyday use in hospitals and nursing homes with the shortest possible distances for patients and residents or for a bit of privacy in student accommodation. The Food Line provides silent cooling comfort without compromising. As the only cooling appliance in this class, the models are suitable for fresh food.

A+  
Noiseless

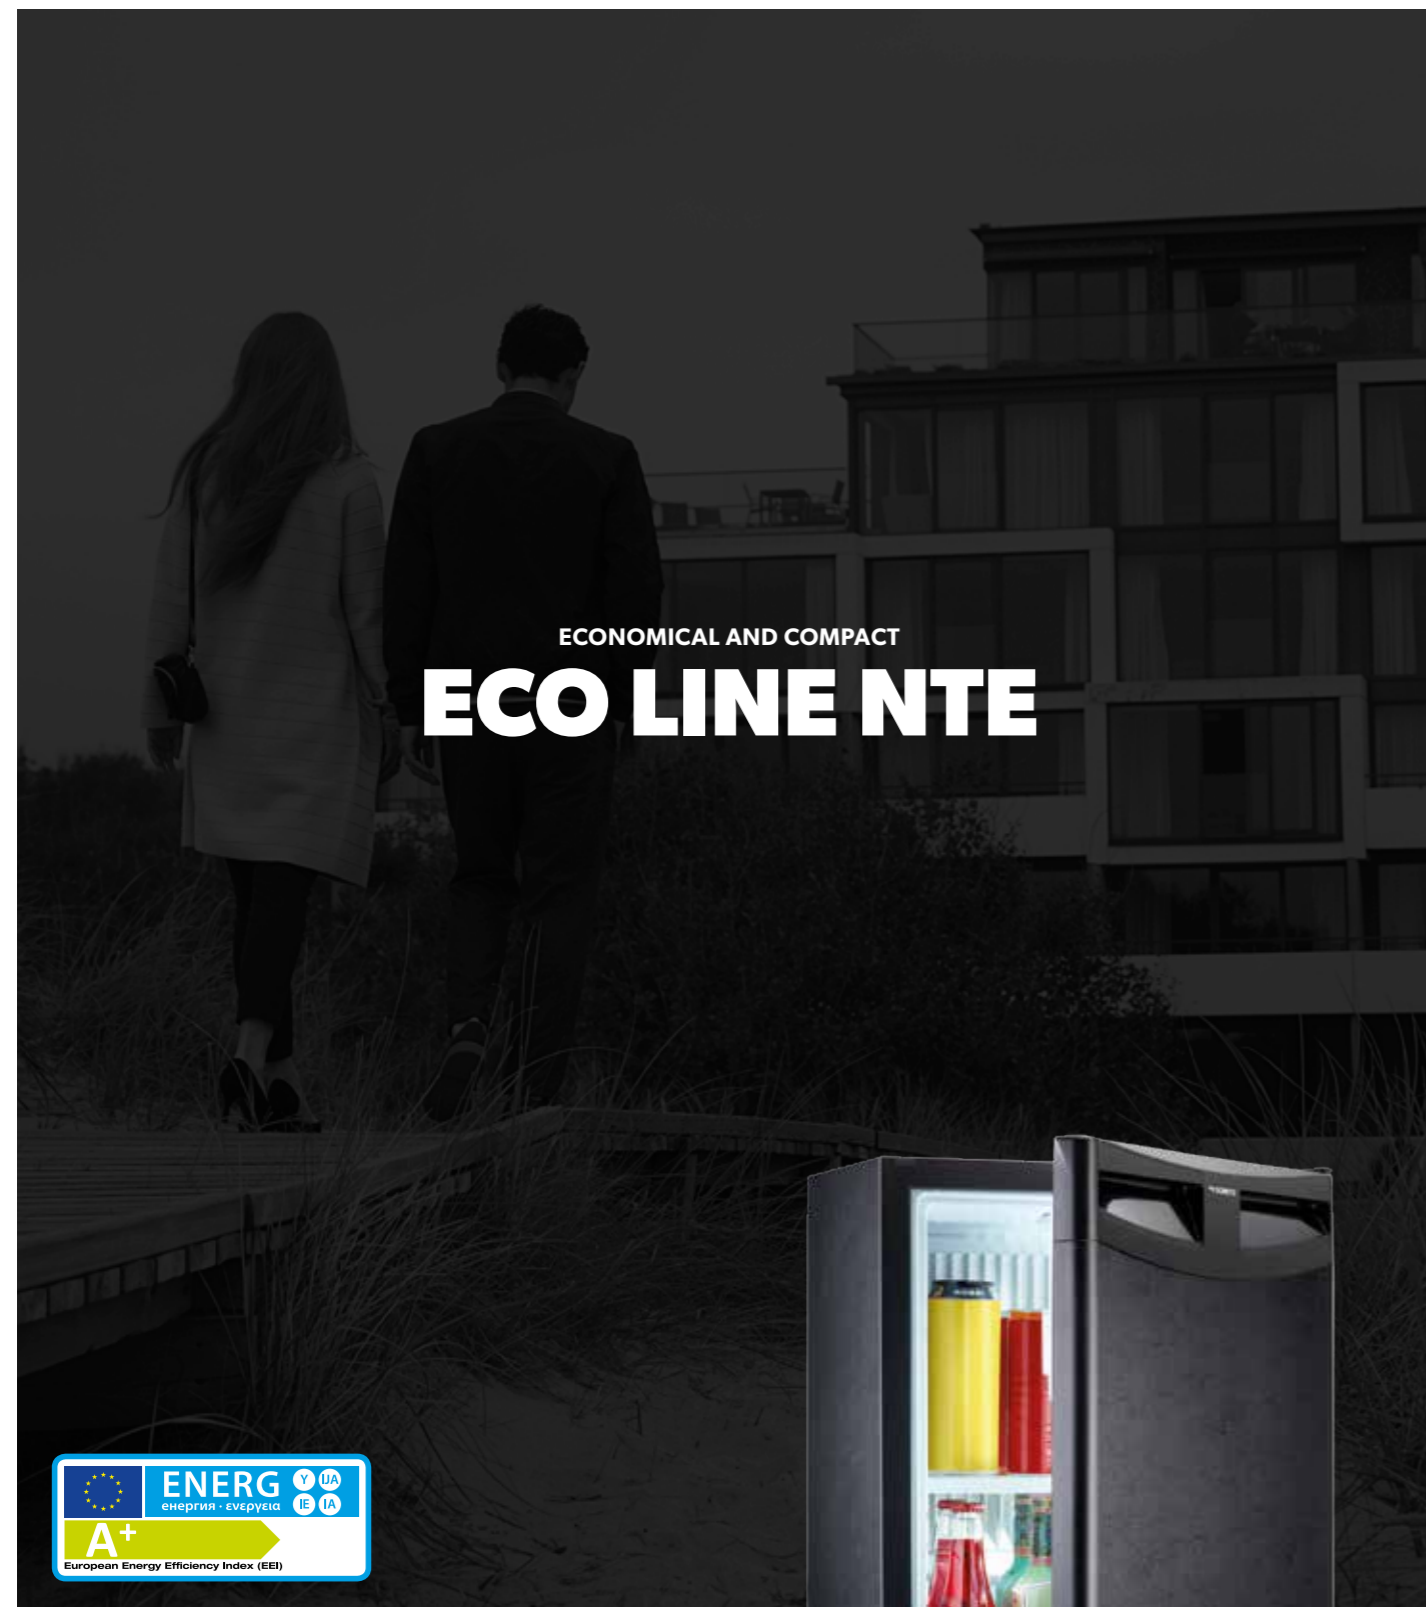

## THE ECO CLASS BY DOMETIC

COMPACT AND EXTREMELY ECONOMICAL  
EFFICIENT // COMPACT // NOISELESS

Cooling comfort with real savings potential. The miniBars in the Eco Class have a particularly compact design and also make a positive contribution to the energy balance. Eco Line NTE miniBars use an energy-efficient, noiseless thermoelectric cooling system with a superior A+ energy efficiency index. They will be a 100% fit replacement option for old 30 and 40 litre miniBars from previous generations.

And it's not only you who benefits. The miniBars in the Eco Class give your guests added value too. Snacks and beverages are kept chilled all the time.

- Powerful thermoelectric cooling unit
- Adjustable temperature setting
- Fully-automatic defrosting for maximum comfort
- Glass Door Option (Absorption cooling technology)

Look forward to your electricity bill! The miniBars in the Eco Line have the A+ energy efficiency class and a record-breaking low power consumption. The outer dimensions of the miniBar are also extremely compact thanks to the thermoelectric cooling units. Furthermore, the models score points with a well-organised interior and an attractive LED interior light.

# MINICOOL WITH FREEZER

Small space, great versatility. The miniCool models with integrated freezers provide cooling comfort in a compact housing. The space-saving design makes them suitable for use in small spaces where a freezer is required.

## FEATURES OF THE MINICOOL WITH FREEZER

- Powerful cooling system
- Fuzzy Logic, the intelligent energy control
- Cooling Unit Control (CUC system)
- Fully-automatic defrosting (WA 3200)

## MODELS : WA 3200

- With curved door
- 2 adjustable door shelves
- 2 adjustable shelves
- Interior light

## EA 3280

- 2 adjustable door shelves
- 2 adjustable shelves
- Interior light

MODEL	WA 3200	EA 3280
Storage volume (litre)	54	65
Freezer (litre)	5	6
Cabinet colour	White	White
Dimensions Stand-alone (H x W x D, in mm)	592 x 486 x 496	592 x 525 x 533
Input rating (W)	95	105
Can be built-in/integrated	-	●
Variable door hinge	●	●
Power consumption (kWh/24 h)	1.40	1.60
Noise level (db[A])	0	0

# DOMETIC MINIBARS

## HANDY HINTS ON VENTILATION

To ensure optimum cooling performance with minimum energy consumption, several basic principles need to be followed when installing an absorption miniBar. The heat which the cooling unit extracts from the refrigerator interior is emitted at the back of the miniBar.

There must be sufficient ventilation here to prevent a build-up of heat.

The free ventilation space for incoming and outgoing air should be at least 200 cm<sup>2</sup>. The distance from the rear of the miniBar to the rear wall of the furniture must be at least 2 cm. When installing the miniBar, ensure that it is standing on a stable and horizontal surface, and not directly near a heat source.
